Results-driven Frontend Developer with 5+ years of experience delivering scalable web and mobile applications in banking, fintech, and eCommerce industries. Skilled in building user-focused digital products, improving application performance, and collaborating within Agile teams to deliver high-quality solutions. Proven ability to contribute across the full development lifecycle, from product enhancement and system integration to code quality and team support.

EXPERIENCE

Heng Feng (Cambodia) Bank PLC

July 2025 - Present

Senior Frontend Developer

- Developed the Heng Feng Digital Banking Portal using Nuxt.js.
- Developed and deployed an internal Learning Management System (LMS) using PHP and React.js.
- Performed testing and reported bugs in the digital mobile banking app and various banking-related portals to management.
- Assisted in designing assets for the digital mobile banking app theme using Figma.
- Oversee bank transactions via Bakong and support transaction disputes.
- Developed and maintained the HFCB digital mobile banking application, supporting core banking features and ongoing enhancements using Flutter.

WING Bank (Cambodia) Plc

December 2023 - July 2025

Frontend Developer

- Developed a feature-rich eCommerce super app using Flutter, Kotlin and Swift.
- Supported team members, managed development repositories, and conducted thorough code reviews to ensure quality and consistency.
- Implement additional payment options for Wingmall, such as Google Pay and Aceda, to enhance user convenience and flexibility.
- Developed and maintained responsive, user-friendly Wingmall and Wingmall Merchant eCommerce mobile apps using React Native.
- Developed personalized management portals using React and Next.js.
- Contributed to the Scrum framework, collaborating in an agile environment.
- Integrated and optimized RESTful and Firebase APIs for performance and scalability.

ZANDO GROUP

October 2021 - December 2023

Full Stack Developer

- Developed and maintained responsive, user-friendly clothing eCommerce Zando and Ten11 apps across mobile and web platforms using React Native, React, and Next.js.
- Handled migration and maintenance of customer databases in MySQL.
- Built an inventory management mobile app and web portal using React Native and React.js for internal company use.
- Developed interactive mini-games for customer engagement during events using React and Vite.
- Developed an HR mobile app for company employees, featuring clock-in/out, payslip access, performance goal tracking, appointment booking etc.
- Built and integrated Prize Game Promotions into store Zando and Ten11 apps with Vite and React for enhanced user engagement.
- Integrated and optimized RESTful APIs to enhance performance, scalability, and overall system efficiency.
- Provided support to team members and managed the development repositories.

Full Stack Developer

- Developed and maintained responsive, user-friendly eCommerce A9 Online web app using Vue.js.
- Developed backend RESTful APIs using Go and Node.js.
- Integrated and optimized RESTful APIs to enhance performance, scalability, and overall system efficiency.

PROJECTS

Balancify - Expense Management System

April 2024 - Present

<https://balancify.vercel.app>

Built in my spare time, this web app streamlines group expense tracking and settlement, making it easier to manage shared costs with friends and family.

Wingmall - qCommerce and eCommerce platform

<https://wingmall.com>

As a Frontend Developer at Wing Bank, I optimized, refactored, and maintained the performance of the mobile app that enables users to order food, beverages, and international products directly from their phones.

Zando - Clothing eCommerce platform

<https://zandokh.com>

A project I worked on while serving as a Software Developer at Zando Group, involving both a web and mobile application. The platform allows users to browse and purchase the latest trending clothing from a variety of popular brands.
